

Public methods in the Order class:

add()

remove()

getList()

add() Tests:

- Add a chicken sandwich, expect true, returned true
- Add a beef sandwich, expect true, returned true
- Add a fish sandwich, expect true, returned true
- Add a string "Hello", expect false, returned false
- Add a string "Professor", expect false returned false

remove() Tests:

Added the same sandwiches to the list as in the add() test

- Remove the chicken sandwich, expected true, returned true
- Remove the beef sandwich, expected true, returned true
- Remove the fish sandwich, expect true, returned true
- Remove the chicken sandwich again, expect false, returned false
- Remove the beef sandwich again, expect false, returned false
- Remove the fish sandwich again, expect false, returned false

getList() Tests:

Added the same sandwiches to the list as in the add() test

- Create a new temp list with the same contents as should be in the Order list, use getList() to get the actual Order list and compare the two to see if they are the same, expect true, returned true
- Added a new sandwich to the temporary list used getList() to get the actual Order list which did not have the new sandwich added to it, compared the two lists again, expect false, returned false
